

## NEWS RELEASE

### **NEW LIQUID FUSION “BLACK/WHITE” SERIES RENTAL FLOOR**

Los Angeles – Holo-Walls, LLC, developers of the unique portable interactive Liquid Fusion floor tiles and table systems, has added their new “Black and White” series Liquid Fusion floor system to their rental inventory.

Born from the popularity of the company’s “Purple/Orange” and the “Aqua” rental line of portable liquid fusion flooring, the new “Black and White” features a black colored liquid in a white base tile for a new twist on popular black and white checkered flooring. Each tile is 36 inches square with a total thickness of only  $\frac{3}{4}$  of an inch. The light-weight modular liquid-filled tiles are made up of two sheets of a PVC base with a polycarbonate anti-slip surface. Finished floor size can be up to 24 by 24 feet.

The two sheets are combined and sealed with non-toxic, environmentally safe liquids that swirl around as pressure is exerted along its surface. Dancing, walking and other surface activity stimulates the play of colors and forms in continuous evolution as the memory trace of footprints are left behind then, gradually, the encased colored liquid fills back in. A holographic glitter is added to the black liquid offering a shimmering “sand-like” appearance when illuminated with any light.

The new Black and White series are integrated into a “SnapLock” floor

system for ease of assembly, handling and shipping. Applications include dance floors, fashion show runways, walkways, platforms, stage surfaces, trade shows and exhibits. Tiles are crated for easy shipping anywhere in North America with installation being handled locally. Rentals start at \$50 per tile plus shipping.
