

HOLO-WALLS' CUSTOM PRINT WEDDING DANCE FLOOR A SUCCESS

Los Angeles – Holo-Walls, LLC, developers of the unique film and floor products recently created a complete custom wedding dance floor print for Chic Accents of San Antonio Texas.

The 30 foot by 30 foot dance floor featured a customized pattern created on a gloss white vinyl with a removable floor adhesive for easy application and removal. To line up the pattern perfectly, the print was created in strips with registration markings for creating a perfect, seamless pattern.

The process started with a simple image the bride found online. It was not suitable for printing but a similar image was found through an online stock photo and image site. Once the final layout was approved, a custom monogram was created for the center of the dance floor. The finished Illustrator file was used to create the final print. The vinyl strips were shipping to Chic Accents where they applied the pattern over the hotel supplied dance floor.

"This thing was freak'n awesome! Thanks for all the hard work on getting here on short notice and I have another job for you!", exclaimed Steve Riebel, owner of Chic Accents.

Holo-Walls can create any custom floor print in any design or color. Simple monogram prints are also great to personalize any dance floor. Call or email us for more details and pricing information for your project.
